

**TEN-TEC MODEL 607**  
**KEYER PADDLE**

**GENERAL**

The Model 607 keyer paddle assembly is a single paddle, dual action keyer. Pressing the paddle to the left will ground the DAH line and pressing the paddle to the right will ground the DIT line. No external power is required for these paddles.

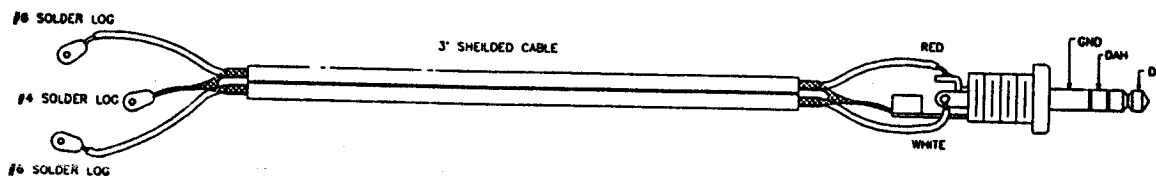

**INSTALLATION**

The Model 607 keyer is terminated to a 1/8" stereo mini plug to be used with either the Ten-Tec Scout, Model 555, or Ten-Tec OMNI VI, Model 563. On either unit, this keyer will plug into the rear panel jack marked "KEYER".

**INITIAL ADJUSTMENTS**

The clearance for both the DIT and DAH contacts is adjustable by a thumbscrew located to either side of the paddle assembly. Adjust both screws for the best "feel". Allow yourself time to practice and use different settings so that you can get them adjusted to your "fist".
