

INFORMATION

A hologram label is attached to this model. This label enables you to distinguish genuine Icom products from counterfeit (fake) products. If the label is not attached to the product when you purchased it, the product could be counterfeit.

As shown in the following 2 images, the Icom logo and GENUINE, can be alternately viewed by changing the viewing angle. The images can be seen more clearly in sunlight and under direct light. If the image does not change, the product could be counterfeit (fake).

You can find more information regarding Icom genuine products on the Icom web site.
<http://www.icom.co.jp/world/genuine-info/>

NOTE: After the product has been used for some time, the label adhesive may weaken due to heat, dust or moisture, and the label could come off.
