

SUNAIR ASB-100A

10-Channel 100-Watt (PEP) HF / Single-Sideband Transceiver

- **LONG RANGE**
The ASB-100A transceiver provides loud and clear communications over distances of thousands of miles. The system is about 8 times more effective than a comparable AM unit.
- **FCC & FAA APPROVED**
The ASB-100A is FCC-type accepted and FAA TSO-authorized (C-31b & C-32b, Category CAAAAAX). The system is also British ARB approved; Canada DOT approved; France STNA approved; Germany FTZ and LBA approved; and Australia and New Zealand DCA approved.
- **LIGHTWEIGHT**
Total weight of the compact ASB-100A is only 18 pounds (8.2 kg).
- **LOW POWER DRAIN**
All circuits in the ASB-100A except the transmitter high-power stages are transistorized for minimal power drain.

APPLICATIONS

The ASB-100A transceiver is designed to provide long-range communications for virtually any type aircraft. The compact control head, shown above, makes the system ideally suited for applications where panel space is limited.
