

## 10-Channel 125-Watt (PEP) HF / Single-Sideband Transceiver

- **EXTRA LONG RANGE**  
With 125 watts (PEP) of efficient, single-sideband power, the ASB-125 will transmit loud and clear over distances of thousands of miles.
- **LIGHTWEIGHT**  
The ASB-125 transceiver weighs only 12½ pounds (5.5 kg.).
- **FCC & FAA APPROVED**  
The ASB-125 is FCC-type accepted and FAA TSO-authorized. The system is also British ARB approved; Canadian DOT approved; and French STNA approved.
- **MODULAR CIRCUIT DESIGN**  
Solid-state, plug-in circuit boards facilitate frequency changing and maintenance.
- **QUIET OPERATION**  
Adjustable squelch permits noise-free radio watch.

### APPLICATIONS

The ASB-125 transceiver is designed for those who want added power and range in a lightweight airborne system. It is ideally suited for use in light aircraft, business jets and helicopters.
