# New Features

## Super-DX and ASP: Audio Digital Signal Processor

The new Super-DX function increases the receiver sensitivity, and improves weak signal reception. The new ASP is also activated when the S-DX key is pressed. The new Super-DX with the ASP ensures reliable audio quality for weak signals and expands the communication range.

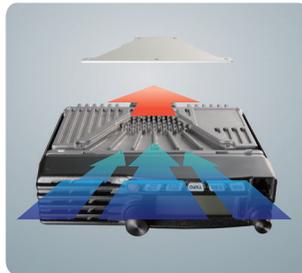

## New 5 W Front Loud Speaker

Redesigned front speaker provides 5 watts of loud audio, the FT-3165R/E speaker has been tuned for improved sound quality. The optional Yaesu MLS-100 external speaker is available for support in noisy field operation.

## 65 Watts Stable High-Power Output with FACC

The compact 2-meter Mobile Transceiver is built with the Yaesu legendary mechanical toughness. The FACC: Funnel Air-Convection Conductor (Wind Tunnel) draws cool air through the wide-open front air intake and directs it to the final amplifier area and out the rear cooling fan. This efficient cooling system ensures stable high output power for continuous long-distance communications.

## User-Programmable Microphone Keys

Four Programmable keys (P1-P4) on the microphone allow one-touch access to your favorite command functions. The microphone function commands replicate the corresponding front panel functions.

**Available Key functions:**
